ESTABLISHED BY JOSEPH PULITZER, hed Daily Except Sunday by the Press Publishing Company, Nov. 53 to 63 Park Row, New York. RALPH PULITZER, President, 62 Park Row. J. ANGUS SHAW, Treasurer, 62 Park Row. JOSEPH PULITZER, Jr., Secretary, 63 Park Row.

Entered at the Post-Office at New York as Second-Class Matter, cription Rates to The Evening For England and the Continent and World for the United States All Countries in the International and Canada.

VOLUME 52......NO. 18,400

THE LADY OF THE TOWER.

TYTE PEOPLE OF THE TOWERS have our own loyalties, ethics, relationships, and these we conceive to be as high as our place in the scheme of things. In its own tower in Park Row The Evening World has recognized but five fellowships-Truth, registered by the Tribune clock; Justice, pedestaled by the City Hall; Wisdom, incarnate in Diana of the Garden; Liberty, goddess of the Upper Bay, and Order, resplendent in the dome of Police. Headquarters.

It is, therefore, a matter of importance to The Evening World that this fellowship is to be enlarged-that the goddess of Civic Fame is soon to have her abode on the tower of the new Municipal Building and command the windows of this sanctum. As the nearest neighbor predestinate of the new divinity we welcome it to the Community of the Towers, and pledge to Civic Fame a devotion no less than that we have accorded to Truth, Justice, Wisdom, Liberty

BY-PRODUCTS.

7 POU can draw useful lessons as well as solemn warnings from Big Business. Such a lesson is set forth in the testimony of beef packers that their profits are from by-products, from what the local butcher used to throw away. From each steer killed there is a profit of only three cents on the dressed meats. There is a profit of forty-two cents on the fat, thirty-seven cents on the hide, eighteen cents on glue from the hoofs. On each carcass there is a total prefit of \$1, only three per cent, of which is from the meat

These figures are questioned, but the general fact they declarethat by-products are the most profitable part of the business-is not open to question. Every efficient industrial combination specializes on its by-products. Standard Oil has lucrative side lines in lubricating oil, vaseline and other substances obtained in refining crude petroleum. The anthracite operators are making a good thing out of the immense refuse heaps beside their crushing plants, from which they derive the "pea" and "buckshot" grades of commercial coal. Stable manure, the farm's chief by-product, is indispensable to its continued fertility. The successful housewife helps out her table with kitchen by-products, with concoctions made from odds and ends that thriftless women throw away.

What is true of glue and vaseline and buckshot coal and stable waste and chicken croquettes is true of your leisure time. You can make it count more than time spent at desk or counter toiling for some one else. It may not seem important to you, but if you are working for a bank or in a trust capacity you will find that the use you make of your leisure means much to your employer. He, or some bonding company, is curious about it. If its by-product is wild outs, he acts accordingly.

The profits of a man's life are in his by-products. In your leisure hours you can work for yourself and make them bear directly on your own development. Do you choose amusements that leave · body stronger and brain clearer and mind stored with scenes and experiences worthy a place there? Do you read the best books, hear the best music, see the best plays? Do you follow lines of study that fit you for higher responsibilities and that render your very diversions significant by helping you to grasp their art and to excel in them? Do you keep up your friendships with people of congenial personality and kindred tastes? Do you carry a full share of the burdens and interests of your household and contribute your part to its possibilities of happiness?

For a street car company "the dividends are in the straps." The dividends of human welfare are accumulated out of office hours.

SCHEDULE K ON FOUR FEET.

TITY PEOPLE know only the canine pest that bites childrenthat attacked 3,000 persons here during the year. Country people know the dog that kills sheep. The latter is introduced to metropolitan notice by report of a suit by a Massachusetts sheriff to recover from certain New York dog owners damages paid lot of ways to make money. by his county to the man whose flock these "pets" raided.

Scientists have been calculating just how many million dollars the American people are taxed every year by the rat, the ground how after now in you and the children mole, the mosquito and the house-fly. They would better figure out what is the cost to the country of the sheep-killing dog, which means every dog but the lap dog. You can nearly put the answer in two words Schedule K. Those tariff taxes running over two hundred per cent., the decline in the nation's flocks, the scarcity and high price of wool and the prevalence of shoddy may be charged in great the part to the American dog.

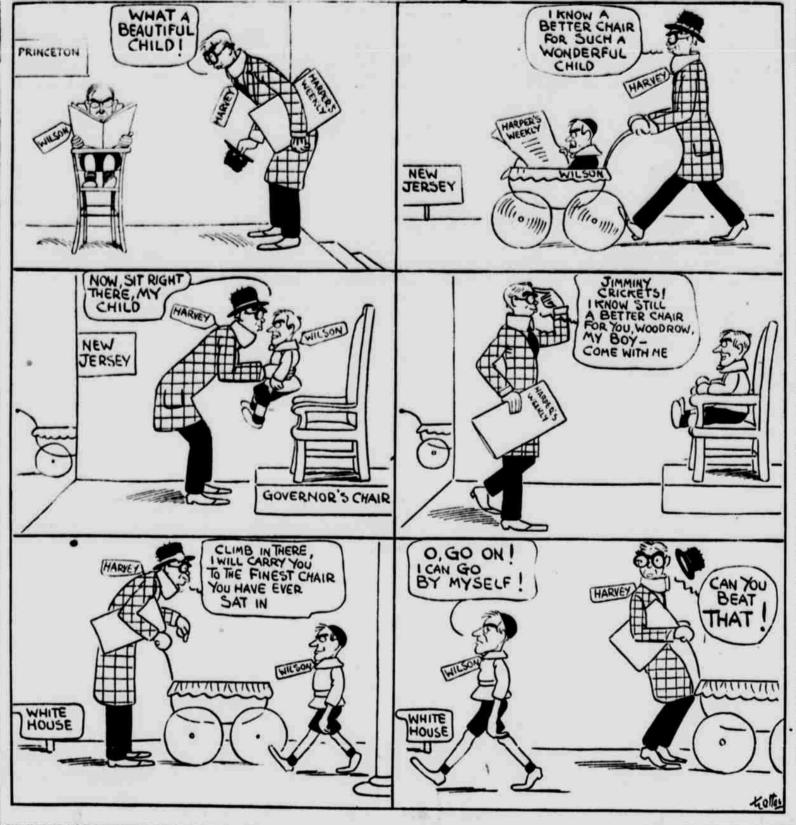

It is the dog's nature to kill sheep. He gets it from his cousin, the wolf. The sleek pet of the day is the sneaking murderer of the dark. Working in bands of three or four he can clean out a flock in a night, tearing their throats, chasing them till they die of fright. The passage of laws in every State compensating farmers for losses from unknown dogs attests how serious is the evil and how stealthily done.

American farmers have had choice of keeping sheep or unmuzzled, unlicensed, unkenneled dogs. They have elected to be dogs. and every man who wears clothes suffers.

Omen-Readers, Ahoy!

we get to September, and again not till gists and prophets, what do you all dope December. Only two in the whole year, up from the foregoing signs? Other If I remember right there were five of readers may be glad to know.

10 Propose it at the

Cupid's Leap Year Deputy Sheriffs.

By Nixola Greeley-Smith.

Copyright, 1912, by The Press Putsishing Co. (The New York World), CN may not be eligible to be deputy sheriffs of New York. The V latest interpretation of the rude law suys so.

But there is one person who can name as many feminine depuries as he likes this year. He is none other than Cupid, high sheriff of hearts. For, as we have all learned from the comic artists, if not by more direct means, this is leap year, when all women have warrants to strike out upon the glittering highway of Romance and arrest in the name of the law of leap year any man who seems an eligible hi Margaret, the Maid of Norway, who reigned over S. land from 136 to 129, issued in 138 (a leap year) the fir ordinance permitting women to propose to men of which

"It is ordained that during the reign of Her Most Bleesed Majesty, for each year known as leap year, each malden lady of both high and low estate shall have liberty to bespeak the man she likes; albeit he refuses to take her to

be his lawful wife he shall be muteted in the sum of one pound or less, as his estate may be; except and always he can make it appear that he is betrethed to another woman."

GREELEY- SMITH

So runs the leap year ordinance of Margaret the Maid It will be seen therefore that women have enjoyed the intermittent privilege of

proposing for more than 600 rents. I wonder if in all that time 600 or even sixty women have availed themselves of it. I wonder, and I doubt more than I wonder. But has it occurred to any one in these 600 years that the loap year statute specifically applies to "maiden ladies" and so excludes, inferentially, at least, the very person most likely to take advantage of it-the dashing, daring widow?

A Flaw in the Leap Year Law.

PPARENTLY this very important question of loap year law has been over-A looked altogether. And yet the specific barring of warrant to profit by their to enable the "malden ladies of high and low estate" to profit by their privilexes than all other influences put together. Perhaps a great number of women propose indirectly, in leap year and out of it.

Man is a proveridal drifter in the shallows of emotion and only the sight of the mermaid flashing brightly ahead or the song of the siren on the distant reef lures him very far out to sea-the sea of matrimony, of course.

Mermalds never propose, nor sirens either.

Once in a while the mermald may turn her head and smile a little or with a splash of a finny tall flirt a little sparkling spray in the face of the pursuer The siren may forsake the classic and sing a little ragtime if she is luring

But she does no more. Only those who lack imagination, charm, romance of plain everyday resourcefulness take the leap year statute seriously. And ev they don't take advantage of it, through a wholesome fear.

Theoretically, of course, a woman has the right to ask a man to marry her whether or not the spirit selzes her in a year that will divide by four. But actually, she never has to propose if the very slightest chance exists that the man would accept her if she did.
